Projects

Polylit   **Live ● GitHub**

Full-stack web app with similar functionality to platform-publisher Medium
- ❏ Built with React and Flux with Rails as a backend API
- ❏ Write and edit stories on top of a React version of the WYSIWG rich text editor, Prosemirror
- ❏ Follow authors and tags, dynamically search by author name, story title, or tag name
- ❏ Bookmark stories for later, custom homepage feed with infinite scrolling

Hexscape   **Live ● GitHub**

Arcade-style physics puzzle game built on HTML5's Canvas and Phaser's P2JS physics engine
- ❏ Play through over ten levels of difficulty that test your thinking skills

Rails + Active Record Lite   **Live ● GitHub**

An open source web server with a built-in ORM system similar to Rails
- ❏ Simplifies SQL queries into Ruby object methods
- ❏ Parses HTTP requests, handles routing, controller actions, and renders views

Skills

Ruby on Rails	Javascript	jQuery	HTML/CSS	Git	React.js
Flux/Redux	SQL	RSpec	Node.js	ES6	Webpack/Babel
